It was really useful to reflect on how we can support our learners to boost their points to push them over the grade 4 boundary

V. useful hints and tips on the applications of the markscheme. Just need to practice using the visualiser now. thanks for a great training session.

I wish it had been a full day of training as I think increased practice applying the mark scheme--with and without the visualiser--would have been really valuable for the whole team.

I would still like to know of any new ideas/innovations in terms of using the visualiser to help support learning in the classroom.

Thank you for providing the training - it was really useful and gave me lots of ideas to put into practise
