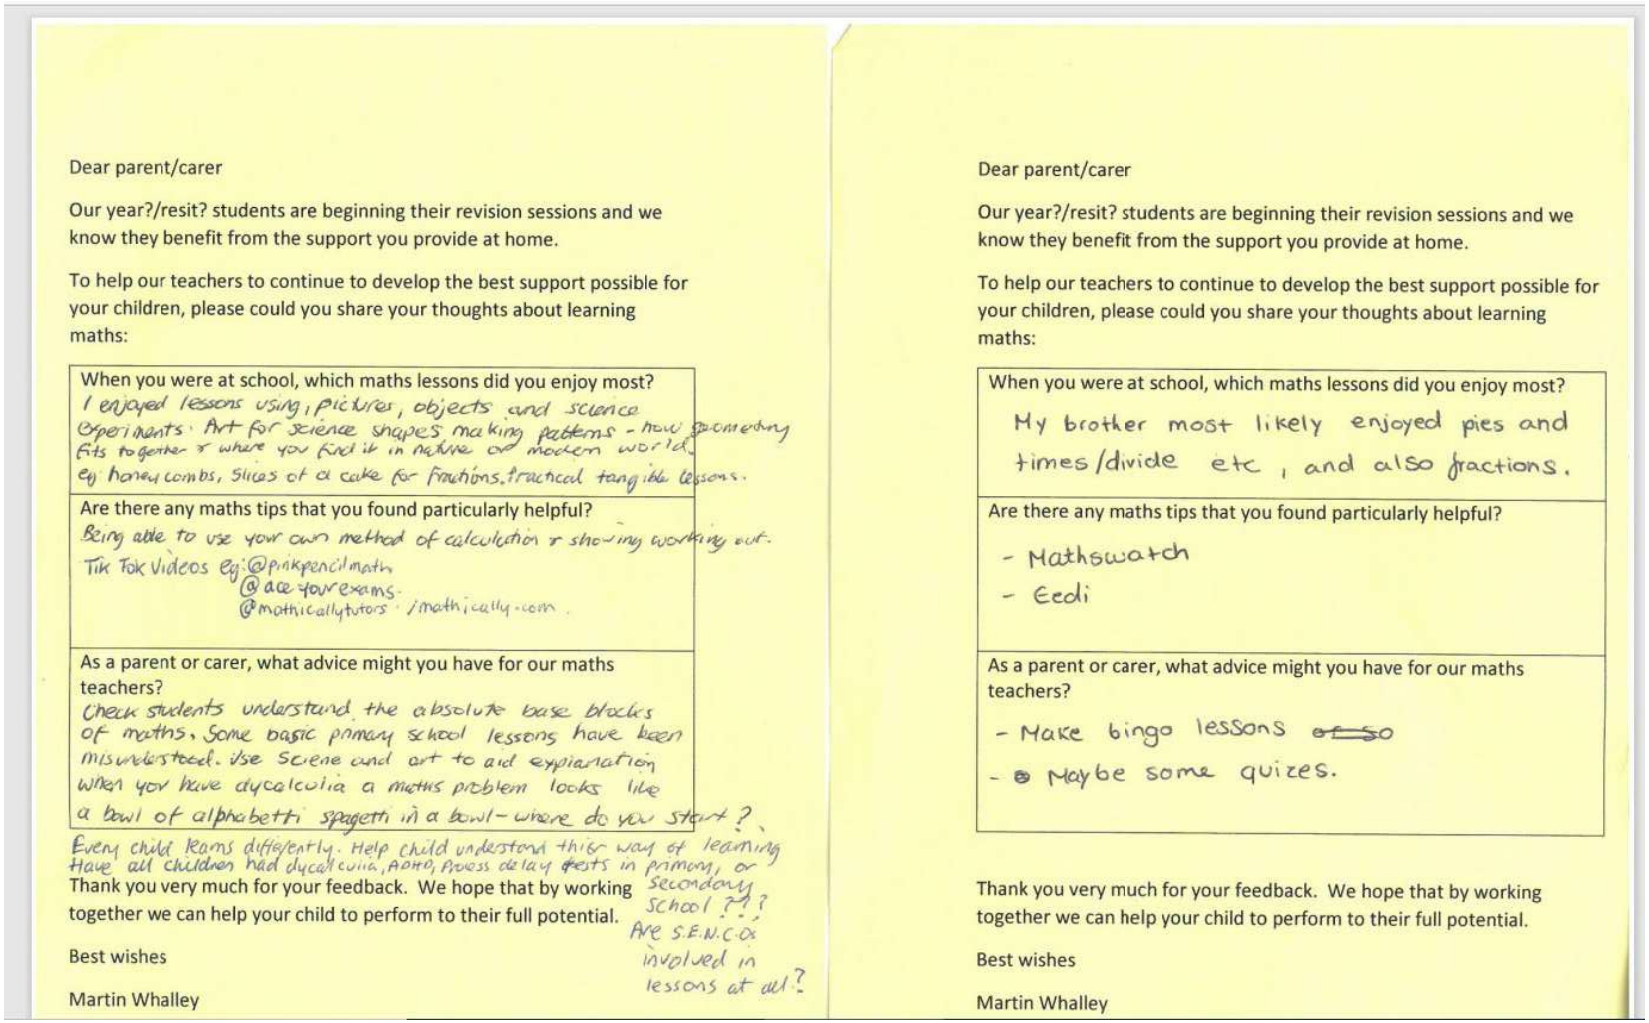
Appendix 2 - Samples of parent/carer survey



Dear parent/carer

Our year?/resit? students are beginning their revision sessions and we know they benefit from the support you provide at home.

To help our teachers to continue to develop the best support possible for your children, please could you share your thoughts about learning maths:

When you were at school, which maths lessons did you enjoy most? I enjoyed lessons using, pictures, objects and science experiments. Art for science shapes making patterns - how geometry fits together & where you find it in native or modern world. eg honeycombs, slices of a cake for fractions. Practical tangible lessons.
Are there any maths tips that you found particularly helpful? Being able to use your own method of calculation & showing working out. Tik Tok Videos eg: @pinkpencilmath @ace your exams. @mathicallytutors · /mathically.com
As a parent or carer, what advice might you have for our maths teachers? Check students understand the absolute base blocks of maths. Some basic primary school lessons have been misunderstood. Use Scene and art to aid explanation when you have dycalculia a maths problem looks like a bowl of alphabetti spagetti in a bowl - where do you start?

Every child learns differently. Help child understand thier way of learning Have all children had dycalculia, ADHD, Process delay tests in primary, or secondary school ??? Are S.E.N.C.Os involved in lessons at all?

Thank you very much for your feedback. We hope that by working together we can help your child to perform to their full potential.

Best wishes

Martin Whalley

Dear parent/carer

Our year?/resit? students are beginning their revision sessions and we know they benefit from the support you provide at home.

To help our teachers to continue to develop the best support possible for your children, please could you share your thoughts about learning maths:

When you were at school, which maths lessons did you enjoy most? My brother most likely enjoyed pies and times/divide etc, and also fractions.
Are there any maths tips that you found particularly helpful? - Mathswatch - Eedi
As a parent or carer, what advice might you have for our maths teachers? - Make bingo lessons ~~of so~~ - Maybe some quizes.

Thank you very much for your feedback. We hope that by working together we can help your child to perform to their full potential.

Best wishes

Martin Whalley
