

## Appendix 4 - Maths student testimonial

### Maths student testimonial regarding working throughout the lockdown period

*"I have found being in the lock down hard but being able to attend college during was much better for me. I find maths a struggle and being able to use Google Classroom and Kerboodle to do maths tasks was ok and they were set out well and easy to follow and understand with the support given but, I feel that for me, I much prefer to be in a lesson/classroom with a teacher showing me and helping me to learn and understand how to do maths. While working in a group with a LF and I feel that I have made some improvement with my maths."*
