

Appendix 7 - English student testimonial

English student testimonial from GCSE Resit students involved with the project

The following are student testimonials considering the project ideas and the feelings on impact and outcomes

Student 1:

"The visualiser has helped me a lot when I had English online because it made annotating the text easy because the teacher was there annotating with us and helping us when we were stuck and it felt like we were back in class because we were seeing what the teacher was highlighting"

Student 2:

"I think that the online classes were a massive help to talk things through and I had free access to drinks like tea and coffee. Plus I had the Alexa playing music to relax. The visualiser was a big help because I could easily look at the work and continue to work. They all helped me during the hard times"
