

Appendix 2 - Initial tutor feedback on the process

Positives:

- I am able to email to learners who did not attend the lesson due to shift work/kids at home do complete the IA when they are available then email me when is convenient to ring them.
- Can assess more than eight at a time (eight is the max number of rooms on BBB).
- I was able to send to Level 1 learners in a lesson, then continue the lesson with Level 2 work without interruptions.

Negatives:

- No matter how many times I said and put in email with link, learners still used their calculator, used more time than was suggested or completed it more than once.
- I don't think the system should show the learner their score, once spoken to the tutor and gone over the workings then we tell them their score, as we may feel it necessary to take off marks for having help or guessed. Then they would not feel disappointed and feel it necessary to take again.
